SECTION 01

Executive Summary

Huma Beauty Saloon is a professional, full-featured web application built for a luxury beauty salon in Jhelum, Pakistan. The platform enables customers to browse services, view offers and gallery, book appointments online, and contact the salon — while giving salon staff a complete admin panel to manage all content and customer requests.

KEY CAPABILITIES

- Dynamic service listings managed from admin panel
- 3-step online booking with email notifications
- Contact form with message storage and email alerts
- Offers and gallery pages linked to admin content
- Color-coded admin dashboard for bookings and messages
- Dual database support: Supabase cloud or local JSON files
- WhatsApp integration for instant customer contact
- SEO-optimized pages with responsive mobile design

SECTION 02

Technology Stack

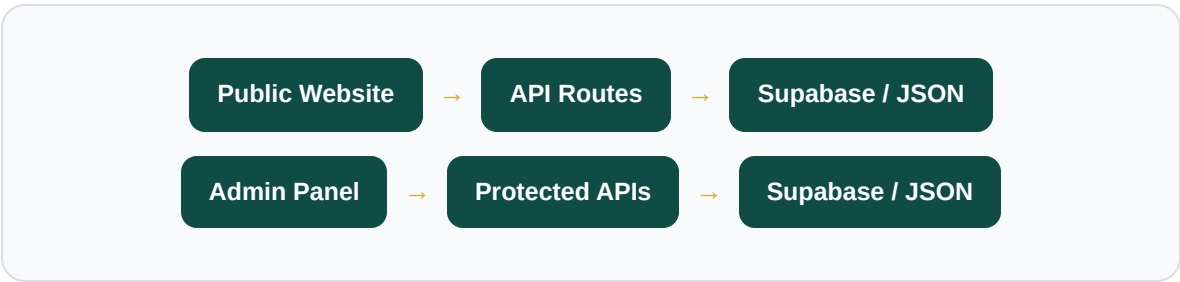

LAYER	TECHNOLOGY	VERSION
-------	------------	---------

Framework	Next.js (Pages Router)	16.2.6
UI Library	React	19.2.4
Styling	Custom CSS	globals.css
Admin Data Fetching	SWR	2.4.1
Cloud Database	Supabase	2.106.2
Local Database	JSON Files	/data/*.json
Authentication	JWT (jsonwebtoken)	9.0.3
Email	Nodemailer (Gmail SMTP)	8.0.9
Deployment	Netlify + Next.js Plugin	5.15.11
Testing	Vitest	1.3.9

SECTION 03

System Architecture

The application uses a **dual-storage architecture**. When Supabase environment variables are configured, all data is stored in the cloud database. Without Supabase, the system automatically falls back to local JSON files — making development and small deployments simple.

DATA FLOW — ADMIN TO PUBLIC

- 1. Admin adds or edits a service in `/admin/services`
- 2. Data saved to Supabase table or `data/services.json`
- 3. Public pages fetch via `getServerSideProps` or API routes
- 4. Home page shows curated featured services; full list on `/services`
- 5. Booking page loads live service names and prices for selection

CORE LIBRARY MODULES

FILE	PURPOSE
<code>lib/services.js</code>	Fetch, group, and format services for pages
<code>lib/serviceConfig.js</code>	Section definitions and home featured list
<code>lib/offers.js</code>	Offer fetching and active-date filtering
<code>lib/gallery.js</code>	Gallery image fetching and display mapping
<code>lib/localDb.js</code>	JSON file CRUD (list, insert, update, remove)

`lib/adminSession.js`

JWT sign/verify and cookie management

`lib/apiUtils/`Validation, rate limiting, input sanitization

SECTION 04

Public Website Pages

URL	PAGE	DESCRIPTION
/	Home	Hero, featured services (6 sections), testimonials, TikTok CTA, booking CTA
/services	Services	All 48 services grouped by category with Book Now buttons
/book	Booking	3-step appointment form with dynamic services
/offers	Offers	Active promotional offers from admin
/gallery	Gallery	Salon work photos managed in admin
/contact	Contact	Contact form with email and message storage

HOME PAGE SECTIONS

ABOVE THE FOLD

- Hero banner with background image
- Book Appointment + Contact CTAs
- Quick booking guide card
- WhatsApp chat link

BELOW THE FOLD

- 6 featured service sections
- Why Choose Us (5 promise cards)
- Client testimonials (8 reviews)
- TikTok embed + gallery link
- Final booking CTA banner

SHARED COMPONENTS

- **Navbar** — Fixed header, scroll effect, mobile hamburger menu
- **Footer** — Site links, contact info, social links
- **ServiceCard** — Image, name, description, price, Book Now
- **ServiceSection** — Section heading + grid + optional More Services link

- **WhatsAppFloat** — Floating WhatsApp button on all pages
- **SEO** — Per-page title, description, canonical URL, OG image

SECTION 05

Services & Categories

The salon offers **48 services** across **6 categories** (8 services each). Admin category values must match exactly for correct grouping on public pages.

CATEGORY	SECTION TITLE	COUNT	EXAMPLE SERVICES
Makeup	Bridal & Party Makeup	8	Engagement, Mehndi, Bridal, Luxury Bridal
Hair	Hair Care & Styling	8	Hair Cut, Color, Highlights, Keratin
Facial	Facials & Skin Treatments	8	Cleanup, Gold, Hydra, Luxury Glow
Nails	Nail Art & Lashes	8	Simple Paint, French, Glitter, Luxury
Mehndi	Mehndi & Henna	8	Simple, Front Hand, Customized, Bridal
Waxing	Waxing & Threading	8	Upper Lips, Eyebrows, Legs, Manicure

HOME PAGE FEATURED SERVICES (26 TOTAL)

Only curated services appear on the home page. Each section includes a **"More Services →"** link to the full list on `/services#section`.

SECTION	FEATURED ON HOME
Makeup	Engagement Makeup, Mehndi Makeup, Bridal Makeup, Luxury Bridal
Hair	Hair Cut, Hair Color, Highlights, Keratin Treatment
Facial	Cleanup Facial, Gold Facial, Hydra Facial, Luxury Glow Facial
Nails	Simple Nail Paint, French Nail Art, Glitter Nail Art, Luxury Nail Art

Mehndi	Simple Mehndi Design, Front Hand Mehndi, Customized Mehndi Design, Bridal Mehndi
--------	--

Waxing	Upper Lips, Eyebrows, Legs Wax, Full Body Wax, Manicure, Pedicure
--------	---

Admin tip: Service titles in admin must match the featured list names exactly for them to appear on the home page. All services always appear on the full </services> page regardless of featured status.

SECTION 06

Booking System

The booking form at `/book` is a guided 3-step wizard that collects customer details, preferred date/time, and shows a confirmation summary before submission.

STEP 1 — YOUR DETAILS

- Full name (required)
- Phone number (required)
- Email address (required, validated)
- Service selection from live admin-managed list
- Pre-fill support via URL: `/book?service=Bridal+Makeup&price=Rs.+18000`

STEP 2 — DATE & TIME

- Date picker (minimum: tomorrow)
- Time field with dropdown suggestions (9:00 AM – 8:00 PM)
- Custom time entry supported (e.g. 3:30 PM, 15:30, 2 PM)
- Optional special requests / notes textarea

STEP 3 — CONFIRM

- Review all entered details
- Submit to `/api/book-appointment`
- Booking saved with status `pending` and `read: false`
- Email notification sent to salon (if email configured)
- Confirmation email sent to customer

BACKEND PROCESSING

CHECK	DETAIL
Rate Limit	5 requests per minute per IP

Validation	Name, phone, email, service, future date, valid time (HH:MM)
Sanitization	HTML escape on all fields
Storage	Supabase <code>bookings</code> table or <code>data/bookings.json</code>
Email	Nodemailer via Gmail (optional, requires env vars)

SECTION 07

Admin Dashboard

Protected admin area at `/admin` with JWT cookie authentication (8-hour session). All admin API routes require valid session token.

LOGIN

URL: `/admin/login` — Credentials set via `ADMIN_EMAIL` and `ADMIN_PASSWORD` environment variables.

DASHBOARD OVERVIEW

TOTAL BOOKINGS

CONFIRMED

PENDING

CANCELLED

SERVICES

MESSAGES

ADMIN MODULES

MODULE	URL	FEATURES
Services	<code>/admin/services</code>	Add, edit, delete services with image, price, category
Bookings	<code>/admin/bookings</code>	Color-coded cards by status; Confirm, Pending, Cancel, Delete
Messages	<code>/admin/messages</code>	Read/unread color cards; Mark Read / Mark Unread
Gallery	<code>/admin/gallery</code>	Upload and manage gallery images
Offers	<code>/admin/offers</code>	Create offers with discount, dates, images

Reviews	/admin/reviews	Approve, reject, or delete customer reviews
Settings	/admin/settings	Salon name, contact, social links, hero text

BOOKING CARD COLORS

STATUS	UNREAD	READ
Confirmed	Bright green gradient	Soft green gradient
Pending	Bright amber gradient	Soft amber gradient
Cancelled	Bright red gradient	Soft red gradient

SECTION 08

API Reference

PUBLIC APIS

ENDPOINT	METHOD	AUTH	PURPOSE
/api/services	GET	None	Return all services
/api/offers	GET	None	Return active offers
/api/gallery	GET	None	Return gallery images
/api/book-appointment	POST	None	Submit booking (rate limited)
/api/send-email	POST	None	Contact form (rate limited)

ADMIN APIS (JWT REQUIRED)

ENDPOINT	METHODS	PURPOSE
/api/admin/login	POST	Authenticate admin, set cookie
/api/admin/logout	POST	Clear session cookie
/api/admin/me	GET	Get current admin session
/api/admin/stats	GET	Dashboard statistics
/api/admin/services	GET, POST, PUT, DELETE	Manage services
/api/admin/bookings	GET, PUT, DELETE	Manage bookings
/api/admin/messages	GET, PUT, DELETE	Manage messages
/api/admin/gallery	GET, POST, PUT, DELETE	Manage gallery
/api/admin/offers	GET, POST, PUT, DELETE	Manage offers

/api/admin/reviews	GET, POST, PUT, DELETE	Manage reviews
/api/admin/settings	GET, PUT	Salon settings

SECTION 09

Data & Database

LOCAL JSON FILES (/DATA)

FILE	RECORDS	CONTENTS
services.json	48	All salon services
bookings.json	Dynamic	Customer booking requests
messages.json	Dynamic	Contact form messages
offers.json	Dynamic	Promotional offers
gallery.json	Dynamic	Gallery images
reviews.json	Dynamic	Customer reviews

SUPABASE TABLES (SQL/SCHEMA.SQL)

services, bookings, messages, gallery, reviews, offers, settings, admin_users — with indexes on bookings status, created_at, and services category.

SECTION 10

Security Features

FEATURE	IMPLEMENTATION
Rate Limiting	Booking: 5 req/min; Email: 12 req/min per IP
Input Sanitization	escapeHtml + sanitizeObject on all API inputs
Form Validation	Server-side validation for all forms
Request Size Limit	Maximum 50KB payload

Admin Auth	JWT in HttpOnly, SameSite=Lax cookie
Route Protection	requireAdmin middleware on all admin APIs
Production Cookies	Secure flag enabled in production

SECTION 11

Design & Branding

COLOR PALETTE

- Primary Teal: #0F4C45
- Teal Light: #1A6B5E
- Champagne Gold: #D4AF37
- Cream Background: #FAF7F2
- Success Green: #16a34a
- Warning Amber: #f59e0b
- Danger Red: #ef4444

TYPOGRAPHY

- Great Vibes — decorative script
- Cormorant Garamond — headings
- Jost — body text and UI

SECTION 12

Environment Setup

Create a `.env.local` file in the project root:

```
# Admin Login
ADMIN_EMAIL=your@email.com
ADMIN_PASSWORD=your-secure-password
ADMIN_SESSION_SECRET=long-random-secret-string

# Email (Gmail App Password)
EMAIL_USER=your@gmail.com
EMAIL_PASSWORD=your-16-char-app-password
EMAIL_RECIPIENT=humaaqi96@gmail.com

# Supabase (optional – without these, JSON files are used)
NEXT_PUBLIC_SUPABASE_URL=
NEXT_PUBLIC_SUPABASE_ANON_KEY=
SUPABASE_URL=
SUPABASE_SERVICE_ROLE_KEY=
```

LOCAL DEVELOPMENT

```
npm install
npm run dev
# Open http://localhost:3000
# Admin: http://localhost:3000/admin/login
```

SECTION 13

Deployment Guide

Configured for **Netlify** deployment with the official Next.js plugin.

1. Push code to GitHub repository
2. Connect repo to Netlify
3. Set all environment variables in Netlify dashboard

4. Build command: `npm run build` (auto from netlify.toml)

5. Deploy and verify all pages and admin login

Email setup: Enable 2-Factor Authentication on Gmail, generate an App Password at myaccount.google.com/apppasswords, and add it to EMAIL_PASSWORD. See EMAIL_SETUP.md in the project for full instructions.

SECTION 14

Project File Structure

```
huma_beauty_saloon-main/
├─ components/      Navbar, Footer, ServiceCard, AdminShell, SEO
├─ data/            Local JSON database (services, bookings, etc.)
├─ docs/            Project documentation (this file)
├─ lib/             Business logic and utilities
│   └─ services.js, serviceConfig.js
│   └─ offers.js, gallery.js
│   └─ localDb.js, adminSession.js
│   └─ apiUtils/    validation, rateLimit, security
├─ pages/
│   └─ index.js      Home page
│   └─ services.js   All services
│   └─ book.js       Booking form
│   └─ contact.js    Contact form
│   └─ offers.js     Offers page
│   └─ gallery.js    Gallery page
│   └─ admin/        Admin dashboard (8 modules)
│   └─ api/          Backend API routes
├─ public/images/   Static image assets
├─ sql/schema.sql   Supabase database schema
├─ styles/globals.css
├─ netlify.toml     Deployment configuration
└─ package.json
```

SECTION 15

User & Admin Workflows

CUSTOMER JOURNEY

1. Visits website → browses featured services on home page
2. Clicks Book Now or selects a specific service card
3. Fills 3-step booking form (details → date/time → confirm)
4. Booking saved; email sent to salon

5. Salon confirms appointment via WhatsApp (+92 335 5462214)

ADMIN JOURNEY

1. Logs in at /admin/login
2. Views color-coded dashboard statistics
3. Manages bookings (confirm/pending/cancel)
4. Reads and responds to customer messages
5. Updates services, offers, gallery as needed
6. Changes reflect immediately on public website

End of Document

Huma Beauty Saloon — Project Documentation v1.0 — June 2026

Prepared for Huma Beauty Saloon, Jhelum, Pakistan
